PROJECTS

BookHotelNow | React Js, SerpAPI, Node Js , Express

2024

- Implemented real-time booking functionality, enabling users to effortlessly reserve their stay.
- Integrated a SERP API, users can search for hotels in a specific city or neighborhood. The API could provide relevant search results based on the location the user enters.
- Created a proxy server with Node.js and Express.js, in hotel booking website which securely fetch data from external APIs (like hotel search or SERP APIs) without exposing sensitive API keys or other credentials to the client-side.
- Enhanced user experience through the introduction of multiple browsing pages.

TastyHub | HTML , CSS , Node Js, React Js and Firebase

2023 - 24

- Implemented Enhanced Modal Experience for Food Items
- Used Firebase Authentication for Register and Login
- Used React Toastify for notifications, which is a smart choice. This enhanced this further by notifying users about special promotions, food ordering status, or errors
- Implemented subtle hover effects and smooth transitions in the responsive navbar for easier navigation
- Developed a responsive food ordering website with dynamic modals for detailed item views, a cart system with real-time item count updates, and seamless user navigation.
